IMPORTANT URGENT CARE INFORMATION

Call our practice or go to an urgent care facility for NON-EMERGENCY care. Why?

- If necessary, our physicians can direct you to an urgent care center that provides care for many of our patients.
- Our physicians have access to your health record and may be able to address your health concern on the phone.
- An emergency room visit may lead to unnecessary tests your doctor would not typically order, adding additional out of pocket costs.
- You may wait a long time to be seen by an emergency room doctor.
- An emergency room visit can cost 10x more than a visit to your doctor or urgent care center.

Ask our staff for recommended urgent care centers.
